Enhance Productivity  
Monitor Alerts in Real Time**

**DATA**

## Improve Your Finishing Productivity

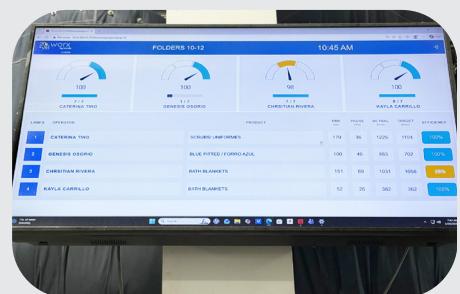

### BENEFIT TO EMPLOYEES ON FINISHING FLOOR

Finishing staff is able to monitor their production rates via the efficiency dial on large flat screen monitors located at each work area. The information displayed is updated every 60 seconds allowing the staff to make any necessary adjustments to maintain on track to achieve their production goals.

An easy to learn log-on touch screen monitor allows staff to select their production classification quickly. Any pause in production can be easily entered for breaks, lunch, equipment issues, and any other easily programmed entries. The maintenance team can also log-on to record equipment down-time issues and the resolution.

### BENEFIT TO PRODUCTION MANAGEMENT

Management is able to view the dashboard screens as the associates view them on the floor and also have the ability to run reports on all production data. This capability also allows you to focus on selected work stations to view real time results for both operator and equipment performance.

Work area production rates monitor

#### Employees:

- Understand true processing rates by individual, classification, shift, and more
- Determine work station utilization
- Identify training opportunities
- Performance review tools

#### Equipment:

- Track equipment production efficiency
- Monitor equipment down time
- Create a maintenance log by machine
- Review engineering performance on equipment repairs
- Identify preventative maintenance priorities

Stay in touch with your production floor

**IMPROVEMENT**

**GLSS is a Cloud-based Visual Productivity Management and Data Analysis System for the Commercial Laundry Industry.**

Provides real time information on labor and equipment efficiency.

Allows your production staff, maintenance, and management quick visual access to immediate and actionable production data.

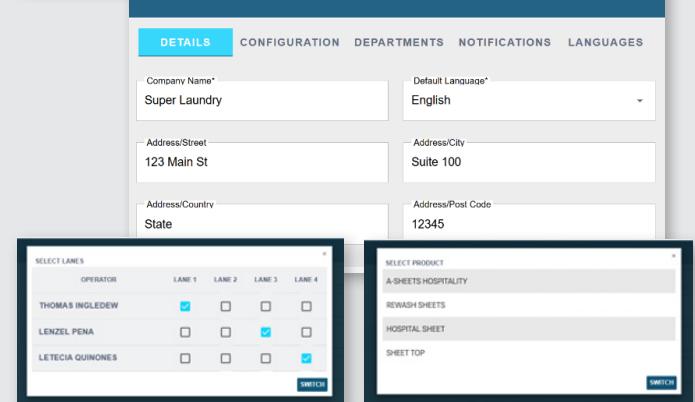

Monitor your floor from virtually anywhere.

*Dedicated Solutions, Seamless Integration*

#### IMPROVED LABOR EFFICIENCY AND PRODUCTIVITY

With clear and concise data, laundry management can take action with confidence to improve productivity and lower labor cost ratios. How much will your laundry save if your weekly labor cost is reduced by just 1% of revenue? Much larger savings are typically gained by GLSS Production Worx users.

#### ELIMINATE MANUAL DATA COLLECTION

Production supervisors spend quality time managing and training staff.

#### SIMPLE TO LEARN – EASY TO USE

Operators are trained in minutes and when working, minimal interaction times means more available time for processing.

#### NO PROPRIETARY HARDWARE

Lower setup and maintenance costs. Easy to add new work stations and equipment.

#### ACCESS DATA – ANYWHERE, ANYTIME

Receive automatic alerts on your phone or tablet, receive scheduled reporting to your email and supervise on-the-go remotely.

#### CLOUD-BASED

Enjoy the performance of this software platform hosted in the cloud that centralizes laundry operations remotely.

#### DEDICATED SUPPORT

Whenever you need it, our GLSS team will be ready to respond.

#### CONTINUED SOFTWARE RENEWAL & DEVELOPMENT

GLSS Production Worx is at the technological forefront of the laundry industry. Gurtler commits to continuous improvement, developing new modules, reports and features.

## Cost-Effective Hardware Low Set-up and Maintenance Costs

GLSS utilizes a simple hardware configuration consisting of mostly off-the-shelf components helping to keep set up costs low. Having no proprietary hardware, key components can be sourced from local, trusted suppliers.

**Each work station to be monitored requires the following hardware:**

- 1 touch screen all-in-one computer with HDMI output
- 1 HDMI cable
- 1 flat screen monitor (32 inches or larger suggested)
- Ethernet network connection
